Las Vegas, NV Zip: 89113

Telephone number (optional): ()

I request that these comments be made a part of the official record.

Incomplete health impact assessment.

- 1 • It is assumed that the only radiation health impact is one of cancer fatality, "latent cancer fatality". Cancer fatality represents only one of many radiation health impacts; other possible effects are premature aging, mild mutations in offspring, excess tumors, and genetic and teratogenic effects.

- 2 As a homeowner in Las Vegas, NV I am opposed to the storage of commercial fuel and high-level radioactive waste at the Yucca Mountain site. I do not want to travel on the same roads as trucks transporting waste. I do not want trucks transporting waste anywhere in the vicinity of my home, work, school, or leisure spots. Please do not place Las Vegas in risk of exposure from waste generated elsewhere. It's time to truthfully consider the possible consequences.

Please note: For your comment(s) to be considered in the Final Environmental Impact Statement, your comment(s) need to be received by the Department of Energy by February 9, 2000. To the extent practicable the Department will consider comments received after February 9.
